Only on non-porus surface with correct surface preparation using WB/ST primers and with correct deposition.

130-150 sqft./L for 2 coats*

*Actual coverage may change from the mentioned coverage depending on the method of application and surface condition.

AVAILABLE PACKS

AVAILABLE BASES

White, Pastel, Clear, Mid Tone, Yellow

PROCESS TO APPLY (PRE-PAINTING STEPS)

Plaster

New masonry surfaces must be allowed to cure completely. The recommended curing period is 28 days for new masonry surfaces while ensuring that they are water cured on a daily basis.

Dampness

The maximum moisture content for any surface that is to be painted should be between 12-14%. Post checking for dampness, appropriate treatment of the damp surface should be carried out treating the fundamental cause for the dampness.

Cleaning

The surface should be cleaned for any presence of loose paint, dust, or grease. Growth of fungus, algae or moss should be removed by wire brushing and water or by bio-wash. When the underlying surface exhibits chalkiness, please use water curing for some time and then apply a layer of Birla Opus One Pro Smooth Primer before topcoat application.

Cracks

Fill surface cracks of up to 5 mm width & 3 mm depth using Birla Opus Alldry Crack Master, applied as per instructions given in the latest PIS before further steps. Loose plaster, structural cracks, etc. need to be treated as per standard construction practices.

PROCESS TO APPLY (PAINTING STEPS)

Sanding

Allow the freshly plastered surface to cure completely. Remove loose paint, dust/dirt etc. with sandpaper no. 180 and wipe the surface clean.

Primer Application

Apply one coat of Birla Opus Calista Pro White Primer/Calista Pro White Cement ST Primer. The primer should be mixed with water/solvent in the recommended ratio. After the application ensure a drying time of 6 hours.

Putty Application

Smoothen the surface by filling undulations with 2 coats of Birla Opus One Pro Smooth Putty. Allow it to dry for 4 – 6 hrs between successive coats. Apply third coat of putty if required and then sand with sandpaper no. 320 and wipe the surface.

Primer Application

Apply 1 coat of Birla Opus Calista Pro White Primer/Calista Pro White Cement ST Primer and allow it to dry for 4-6 hours and then sand the surface using sand paper no. 400 post which wiping the surface will be required.

Topcoat Application

Use 1L paint mixed with 600-650 ml of water and apply 2-3 coats for optimal results. The time between successive coats should be 4-6 hours.

PROCESS TO APPLY (POST-PAINTING CARE)

- Ensure dry dust cleaning at regular intervals.
- While cleaning, wipe gently without intense pressure.
- Give 2 weeks of drying time post application of paint before wet cleaning the wall.

TECHNICAL INFORMATION

Shelf Life: 36 months from date of manufacture

Drying Time: Surface dry time 30 minutes*
*May vary according to temperature and humidity.

Sheen Levels (at glass plate): <5 at 60 deg GH*

*As per recommended internal test method and conditions.

Volatile organic compound (VOC) level in White and bases <100 gm/l

Flash point IS101/1987 Part 1, Sec 6: Not Applicable

Stability of thinned paint: To be used within 24 hours.

Recoating Time: 4-6 hours after the first coat.
